STRENGTHS

PHP
JavaScript (jQuery)
C Programming Basics
Java Basics
Data Structure Basics
HTML4
CSS3
Bootstrap (4,5)
CodeIgniter (3,4)
ReactJS (Basic)
NodeJS (Basic)
Redux (Basic)
MySQL
MongoDB

TOOLS

GitHub
GitLab
BitBucket
Eclipse
Turbo C++
Visual Studio
Slack
XAMPP

HONORS & AWARDS

Online Courses: - o Complete a MOOC course on "Java Programming In Hindi, Data Structures in c, React Js IN Hindi, Data Analyse and Algorithm in c" from Great Learning.

HOBBIES & INTERESTS

Travel and explore new places.
Playing games

EXPERIENCE

GeeksIT Data Solutions Pvt. Ltd. - Full Stack Developer   1st April 2022 to 31st October 2022
- **Full-Stack Development**: Developed both frontend and backend components of web applications, ensuring smooth integration and functionality.
- **Project Management:** Led multiple projects simultaneously, meeting deadlines and managing project timelines effectively.
- **Team Collaboration:** Coordinated with team members, assigned tasks, and provided guidance to resolve technical issues, ensuring high-quality deliverables.
- **Client Interaction:** Conducted regular meetings with clients to discuss project progress, address concerns, and resolve production-level issues, enhancing overall client satisfaction.
- **Problem Solving**: Identified and fixed bugs, optimized performance, and implemented new features based on client feedback and project requirements.

GeeksIT Data Solutions Pvt. Ltd. - Full Stack Developer (Intern)   1st Oct 2021 to 31st March 2022
- Developed and maintained both **frontend and backend** components of web applications using various frameworks and libraries.
- Collaborated with team members to **design and implement features, ensuring the functionality of applications met client requirements**.
- **Gained hands-on experience** in integrating **frontend interfaces with backend systems and managing version control with tools like Git**.

PROJECTS

Invento
- Combines both **frontend and backend technologies** for a comprehensive **inventory management system**.
- The project is designed with both frontend and backend development, utilizing a **PHP framework for backend operations and JavaScript with jQuery** for a dynamic and responsive frontend, providing **real-time updates, accurate management, and scalable,** customizable solutions for various businesses

Drugstore
- **Mathematical Calculations**: Handles calculations to generate accurate **medicine bills for patients**.
- **Receipt Generation**: Produces detailed **billing receipts** for each transaction.

Matrimonial
- **First Project Experience**: Represents the user's initial project during their **learning stage**, **focusing on developing fundamental skills**.
- **Matrimonial Platform**: Likely involves building a platform for connecting individuals seeking **matrimonial relationships**, incorporating **user profiles, search functionality, and matchmaking features**.

E-COMMERCE (Mini Project)
- **Comprehensive Development**: Involves the complete development cycle from conception to **implementation, including design, coding, and deployment**.
- **Feature-Rich Implementation**: Includes various features and ideas implemented throughout the project's lifecycle, demonstrating a full understanding of **e-commerce functionality and user requirements**. .

Blood Bank Management System (MERN Stack)
- **Blood Donation and Request Platform:** This MERN stack application includes features for **user registration, donor and requester dashboards, blood donation and request management, and an admin panel for overseeing users and donations**.
- **Secure and User-Friendly Design**: The platform employs **JWT forsecure authentication** and a responsive **design, ensuring a smooth user experience** across devices. .
