1.5+ yrs experience | 30+ bugs resolved | 25% API performance boost | 8.67 MCA CGPA

Summary

Full-Stack Software Engineer with **1.5+ years** of professional experience designing and delivering scalable web applications using the **MERN stack** (MongoDB, Express, React, Node.js), **PHP/CodeIgniter**, and **MySQL**. Skilled in building secure **RESTful APIs** with **JWT authentication**, developing responsive **React** interfaces, and optimizing backend performance. Experienced with **Git**-based version control, iterative development practices, and delivering clean, maintainable code for high-performance, user-centric solutions.

Technical Skills

Languages: JavaScript (ES6+), PHP, SQL, Python (familiar), Java (OOP – familiar)
Frontend: React.js, Next.js (familiar), HTML5, CSS3, Bootstrap, jQuery, Context API
Backend: Node.js, Express.js, CodeIgniter, Django (familiar), JWT Authentication
Databases: MongoDB, MySQL
DevOps & Tools: Git, GitHub, Postman, VS Code
Testing & AI: GitHub Copilot, AI API integration
Methodologies: Agile/Scrum (familiar), MVC Architecture, Responsive Web Design, RESTful API Development

Experience

Software Engineer Intern — MERN Stack — Infatoz Technologies January 2025 – June 2025

- Launched **3+ responsive** React.js and Bootstrap interfaces, improving UI rendering performance and increasing user engagement by **20%**.
- Engineered **5+ secure RESTful APIs** using Node.js and Express.js with JWT-based authentication, reducing unauthorised access incidents by **100%**.
- Maintained **100%** Git commit coverage across all features, participating in **weekly** code reviews to uphold code quality standards.
- Delivered **10+ reusable React components** following modular architecture principles, reducing feature development time by **30%**.

Full Stack Developer — GeeksIT Data Solutions Pvt. Ltd. October 2021 – October 2022

- Spearheaded **2–4 end-to-end web projects** using PHP (CodeIgniter) and jQuery, covering full SDLC across **3+ client requirements** from gathering to deployment.
- Optimized **18+ REST APIs** through query refactoring and indexing strategies, reducing average API response time by **25%**.
- Boosted overall site performance by **25%** and resolved **30+ critical bugs**, enhancing platform stability by **20%** and reducing downtime.
- Architected and maintained **10+ MySQL** database schemas, ensuring data integrity and efficient querying for high-traffic modules.

Note: October 2022 – January 2025 dedicated to MCA postgraduate studies (see Education).

Projects

E-Commerce Backend API 30 March 2026 – 1 April 2026

[GitHub]

Node.js, Express.js, MongoDB, JWT, Zod, bcryptjs

- Built a production-ready RESTful e-commerce API with **3 role-based modules** (Auth, Products, Orders) featuring **JWT access + refresh token** rotation with **httpOnly cookie** security.
- Implemented full product catalogue with **pagination, filtering, sorting, and search**; order management with **auto GST (18%) + shipping** calculation and stock restoration on cancellation.
- Enforced security best practices: **bcryptjs** password hashing (12 salt rounds), **Zod** input validation on all routes, **rate limiting** (100 req/15 min), CORS, and SHA-256 hashed reset tokens with 10-min expiry.

ChaiHeadQ — Django Social Media Application

February 2026 – February 2022

[GitHub]

Python, Django, HTML, CSS, SQLite

- Delivered a Twitter-style social media platform with **5+ core features** using Django's MVC architecture, secure user authentication, and role-based content access control.
- Authored complete CRUD functionality for tweets across **4+ Django models**, leveraging Django ORM to reduce raw query complexity by **30%**.
- Integrated photo upload support (Pillow), tweet search across **2+ content types**, and Unicorn for production-ready deployment on a responsive HTML/CSS frontend.

ShreeRadha Web Application

October 2025 – October 2025

[GitHub] [Live]

React.js, Node.js, Express.js, MongoDB, REST API

- Launched a real-time Naam Jap tracking system with live session monitoring for **50+ concurrent users**, delivering a seamless experience with zero-reload state management.
- Engineered a modular, **10+ component** React architecture with Context API for state management, enabling smooth feature expansion and long-term maintainability.
- Integrated a Node.js/Express REST API backend with MongoDB to persist session data across **3+ active modules**, handling concurrent user tracking efficiently.

BloodBank Management System

October 2025 – October 2025

[GitHub] [Live]

React, Node.js, Express.js, MongoDB, MySQL, JWT

- Built a full-stack blood bank platform with **8+ REST API endpoints** and secure JWT authentication, reducing blood request processing time by **40%**.
- Established a dual-database setup (MongoDB + MySQL) across **2 user roles**, implementing blood group matching logic to automate **100%** of request routing.
- Crafted a React.js frontend with real-time status updates and role-based access control, supporting **2+ concurrent user sessions** efficiently.

Education

Master of Computer Applications (MCA) — 8.67 CGPA

January 2022 – October 2024

CMR Institute of Technology, Bengaluru, Karnataka

Bachelor of Computer Applications (BCA) — 73.30%

July 2018 – October 2021

Seth Gyaniram Bansidhar Podar College, Nawalgarh, Rajasthan

Certifications & Achievements

- Earned **JavaScript Advanced Certification** — CutShort (2025)
- Completed **Python Programming Course** — Simplilearn (2025)
- Completed **Introduction to JavaScript** certification — Great Learning (2024)
- Completed **SQL Assessment** — TestDome (2023)
- Earned **Java Programming Certification** — Great Learning (2022)
